

### Right Guide

This column is designed to give official VA answers to veterans' readjustment problems. Send questions to: Right Guide, 1041 South Broadway, Los Angeles 15, Calif.

**Veterans' Hospitalization**—The next two issues of Right Guide will be devoted to an explanation of hospitalization and medical services offered veterans through the Veterans Administration. Veterans should familiarize themselves thoroughly with these benefits and procedures necessary to obtain them.

1.—Who is Eligible for Hospitalization in a V. A. Hospital?  
(a) War veterans, including the women's reserves, who were discharged, released, or retired under conditions other than dishonorable, and who are in need of hospital care;

(b) Peacetime veterans who were discharged for disability under conditions other than dishonorable, or who have a service connected pension, and who need treatment;

(c) Certain veterans of allied countries who have service connected disabilities;

(d) Beneficiaries of the U. S. Public Health Service, U. S. Employees Compensation Commission, and certain other government agencies;

(e) Servicemen on active duty.

2. Are There Priorities Involved in Veterans Hospitalization?

Yes, when space is limited, patients are admitted in the following order of preference:

(a) Emergency cases;

(b) War veterans who need treatment for their service connected disabilities;

(c) Peacetime veterans who need treatment for their service connected disabilities;

(d) War veterans with 90 days of service or a disability discharge, who have no adequate means of support, and who need hospital treatment;

(e) Peacetime veterans discharged for line of duty disability, or drawing a service connected pension, who have no adequate means of support and need hospital treatment;

(f) War veterans, not dishonorably discharged, who need hospital treatment which they would be unable to pay for.

3. May a Private Doctor Certify My Need of, and Have Me Certified for, Admission to a V. A. Hospital?

If your doctor is a member of the California Physicians Service he can certify to your need for hospitalization. In emergencies any doctor may make necessary arrangements.

### 23 Nations Eligible For Famine Relief

The hungry and starving people of 23 countries are eligible to receive the food contributed through the Emergency Food Collection, it was announced today by Secretary of Commerce Henry A. Wallace, national chairman of the drive.

Wallace said that he had been notified by UNRRA (United Nations Relief and Rehabilitation Administration), on whose behalf the appeal is being made, that 18 countries now receiving UNRRA assistance—six other liberated nations in Europe, and famine-stricken India are eligible to receive the food.

The countries receiving UNRRA assistance are Albania, Austria, Byelorussia, China, Czechoslovakia, Dodecanese Islands, Ethiopia, Finland, Greece, Hungary, Italy, Korea, Philippines, Poland, Ukraine and Yugoslavia. The six other liberated countries in Europe eligible to receive the food are: Belgium, France, Netherlands, Denmark, Luxembourg and Norway.

The allocations committee for the Emergency Food Collection, Mr. Wallace stated, will allocate both the food that is bought with cash gifts to the collection and the contributed food canned in tin. William L. Batt, former vice-chairman of the War Production Board, is chairman of the allocations committee.

Mr. Wallace said that the largest individual donation so far received at national headquarters of the drive, 100 Maiden Lane, New York City, is an anonymous gift of \$6,652.43 representing the life-savings of a working woman in a West Coast city.

Churches of Torrance and the Lions Club are handling collections here.

### DEFECTIVE EYESIGHT

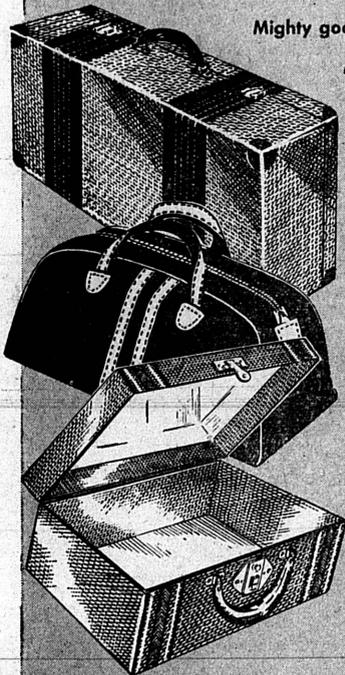

Motorists are warned to keep out of the driver's seat of an automobile if they have defective vision and are not properly fitted with glasses. Some 349 serious accidents occurred in California last year because of this dangerous practice.

# OWL - SONTAG FIRST FOR THE 4<sup>th</sup>

1269 Sartori - Torrance
